

ExploreBangladesh - User Documentation

Introduction

This document provides user-level guidance for navigating and using the ExploreBangladesh web application. ExploreBangladesh allows users to explore cultural and travel-related content from Bangladesh and interact with it.

User Roles

1. General User

- Browse content related to food, movies, music, scenery, and sports
- Read travel information (accommodation, events, emergency, etc.)
- Register, log in, and like or comment on content

2. Admin

- Log in securely to the admin dashboard
- Add, update, or delete content in all major categories
- Manage uploaded images and database entries

Accessing the Application

1. Open a web browser.
2. Navigate to: <http://localhost:8080/ExploreBangladesh>
3. The homepage will load with featured categories.

User Registration & Login

1. Click on the 'Login' option in the navigation bar.
2. If you're a new user, select 'Register'.
3. Enter your details and submit the form.
4. After successful registration, log in using your credentials.

Browsing Content

- Navigate through categories such as food, music, movies, sports, and scenery using the navigation menu.
- Each page displays items with images and descriptions.

Interacting with Content

- Click the 'Like' button to like an item.
- Add comments in the comment box at the bottom of each item's page.

Admin Panel Usage

1. Visit: <http://localhost:8080/ExploreBangladesh/admin/login.jsp>
2. Log in using your admin credentials.
3. Use the sidebar to manage:
 - Food, Music, Movies, Sports, Scenery (Add/Edit/Delete)
4. Review user interactions if applicable.

Troubleshooting

- Ensure Tomcat server is running on port 8080.
- Confirm database connection in `DBConnection.java` is correctly configured.
- If images or pages don't load, verify resource paths and deployment settings.
